GATIC® Pave. High-performance access covers for paved areas.

2017

Pave

Product Features and Benefits

Gatic Pave is a comprehensive system of single, duct and multi span access covers and frames for use in paved areas where an aesthetic finish is required in environments up to D400 loading.

Cover types

Covers are recessed for an aesthetic pavour infill.

Applications

Urban public places and parking areas.

Materials

The components of Pave covers are manufactured from: Ductile iron to BS EN 1563 and structural steel sections (removable beams) to BS 4-1.

Non-rocking

Correctly installed, Pave covers will be non-rocking under slow moving traffic.

Watertight

A film of graphite grease between the contact faces of Gatic units provides a gas and airtight seal, and a watertight joint under normal rainwater conditions.

Secure and vandal resistant

Gatic covers cannot be removed without the correct lifting key so unauthorised removal is virtually impossible. Locking bolts can be fitted to Gatic cover keyways as an additional security feature. Gatic recommends that due to their weight with pavour infill, when Pave covers are removed they are lifted vertically using Gatic's mechanical lifting keys.

Ventilation

If you require ventilated covers please refer to Gatic.

Closed keyways

Pave cover keyways are closed and fitted with plastic plugs to prevent the ingress of dirt.

Loadings

All Pave covers will withstand test load and maximum permanent set criteria specified in BS EN 124: up to D400.

Secure support

The clear opening width between supporting frames are at least 7mm greater than the pit/chamber design to allow for minor deviations in pit construction dimensions.

Beam wallbox

Supporting beams in Pave Multispan units are easily removed with appropriate lifting equipment for access to the total chamber area. Beam wallboxes do not project into the chamber opening.

Finishes

Covers, removable supporting steelwork and side frames are supplied with a galvanised finish.

Installation

Consignments of Pave units are accompanied by comprehensive installation instructions.

Environmental commitment

Responsibility towards the environment is our primary concern. Our customers often now demand products that are made from recycled and recyclable materials, supplied by companies with robust environmental policies to reduce the environmental impact of their projects for future generations.

To meet these requirements we have an integrated Quality (BS EN ISO 9001) and Environmental (BS EN ISO 14001) Management System which encompasses the design, manufacture and management systems within the company and ensures our commitment to continuous environmental improvements regarding the manufacture and design of all our products in the following ways:

- Minimise environmental impact
- Commit organisational resources to energy management
- Reduce energy costs
- Give high priority to energy efficient investments
- Consider life cycle energy costs for all new projects
- Minimise CO₂ emissions year on year
- Use energy from sustainable resources wherever possible

To achieve these goals we have put in place the necessary systems and controls to meet demanding environmental targets and to make sure that these are maintained for the future benefit of the environment and our customers alike.

Gatic services

Gatic offers a full support service to specifiers and contractors, including Computer Aided Design. AutoCAD compatible details of all Gatic products are available. Please consult our technical department for assistance.

In view of our commitment to product improvement, we reserve the right to alter designs without notice. Design changes will not adversely affect the performance or loading capability of our products.

GATIC[®] Pave – Heavy Duty

Single Covers and Frames

Suitable for 11.5 tonne slow moving pneumatic wheel load. Cover test load - 400kN

Pit clear opening sizes L x S (mm)	Cover type
600 x 600	PAV
750 x 600	PAV
750 x 750	PAV

Duct & Trench Covers and Frames

Suitable for 11.5 tonne slow moving pneumatic wheel load. Cover test load - 400kN

Pit clear opening spans (mm)	Cover type
600	PAV
750	PAV

Pave Covers

Pave covers can be supplied to cover ducts or trenches as straight runs.

Pit clear opening spans (mm)	Cover type	Standard Pit clear opening length									
		1300	1450	1600	2000	2150	2300	2450	2700	2850	3000
600	PAV	2	2	2	3	3	3	3	4	4	4
750	PAV	2	2	2	3	3	3	3	4	4	4

Pit clear opening spans (mm)	Cover type	Standard Pit clear opening length									
		3150	3300	3400	3550	3700	2850	4000	4100	4150	
600	PAV	4	4	5	5	5	5	5	6	5	
750	PAV	4	4	5	5	5	5	5	6	5	

The number shown indicates the quantity of cover parts. Other cover sizes may be available. Please refer to our technical department.

Multispan Covers and Frames

Suitable for 11.5 tonne slow moving pneumatic wheel load. Cover test load - 400kN

Specification

Below is sample specification information and notes for Multispan Pave covers and frames.

Loading group Gatic D400

11.5 tonne slow moving pneumatic wheel load – test load 400 kN.

Materials

Covers: Ductile iron components to BS EN 1563.

Structural steel removable beams to BS 4-1

Finishes

Covers, removable supporting steelwork and side frames are supplied with a galvanised finish.

Surround concrete by customer

Concrete strength, using 10mm coarse aggregate, to be:

45N/mm² for a test cube of 150mm or

40N/mm² for a test cylinder of 150mm diameter x 300mm high.

Installation

In accordance with instructions supplied by Gatic.

To specify use size and description format as follows:

Pave Multispan Recessed covers and frames Cover type **PAV recessed**

Multiple access covers recessed for concrete infill with removable beams.

.... in no. (length) x (span) mm pit clear opening galvanised multi span cover and frame.

Pave Type PAV Ductile Iron Recessed Cover in parts complete with

.... in no. x mm galvanised removable support beam spanning the (length) mm way.

Suitable for Loading Group D400 – 11.5 Tonnes Slow Moving Wheel Load (pneumatic tyre).

Standard pit clear opening sizes are shown on Page 7.

Beam sizes and other dimensions are shown on Page 8.

Multispan Covers and Frames

Suitable for 11.5 tonne slow moving pneumatic wheel load. Cover test load - 400kN

Product Selection

Refer to the table to identify which cover and beam configuration you require against pit clear opening length (L) and pit clear opening span (S). All dimensions are in millimetres.

	Pit clear opening length (L) mm	Beam centres (mm)				
		2 parts		3 parts		4 parts
		A	B	C	D	E
2 parts 1 beam	1380	690	690			
	1530	690	690			
	1680	840	840			
3 parts 2 beam	2160	690	780	690		
	2310	690	930	690		
	2460	840	780	840		
3 parts 3 beam	2610	840	930	840		
	2940	690	780	780	690	
	3090	840	780	780	690	
4 parts 3 beam	3240	840	780	780	840	
	3390	840	930	930	690	
	3540	840	930	930	840	
5 parts 4 beam	3720	690	780	780	780	690
	3870	690	780	930	780	690
	4020	840	780	780	780	840
5 parts 5 beam	4170	690	930	930	930	690
	4320	840	930	780	930	840
	4470	840	930	930	930	840

Note: For other pit clear opening sizes please refer to our technical department

GATIC® Pave – Heavy Duty

Multispan Covers and Frames

Covers recessed for pavioir infill

The details below show a typical plan and sections of a Pave Multispan Cover.

Multispan Covers and Frames

Beam Size

The required beam size for Multispan covers is dependent on the pit clear opening length and the loading group.

The table shows maximum beam length against beam size. The removable support beams are supplied by Gatic.

The table also indicates dimensions of the beam wallbox and rebate to suit different beam sizes. See also the accompanying section details.

Support beam size chart

Removable support beam size (mm)	Max pit clear opening length (L)	Beam wallbox dimensions			
		V	W	X	Y
152 x 152 x 37kg/m UC	1300	297	319	360	300
203 x 203 x 52kg/m UC	1750	341	363	405	300
305 x 165 x 54kg/m UB	2300	445	467	510	300
356 x 171 x 67kg/m UB	2850	498	520	560	300
457 x 152 x 82kg/m UB	3450	601	623	665	300
533 x 210 x 122kg/m UB	3900	680	702	745	300

Gatic recommends that due to their weight with pavour infill, when Pave covers are removed they are lifted using Gatic's Mechanical lifting keys.

A Mechanical lifting key is inserted into each of the four keyways found on all Gatic Pave covers which are designed and tested for use with cranes and other mechanical devices.

Full operating and installation instructions are available from Gatic.

Interactive Website

Our website is ultra user-friendly and offers full details of our Slotdrain surface water drainage systems, channel drainage and linear drainage. This includes features and benefits, sizes and load categories, as well as design service and contact information.

The website also contains dedicated Access Covers and StreetWise sections.

COEX Brochure

Gatic COEX is a highly economical solution to protecting underground services. COEX is a system of single duct and multi span access covers and frames for areas of slow moving traffic, with a choice of cover types - concrete infill recessed or solid top. The range includes single covers, duct and trench covers, and multi span access covers. There are solutions for straight run and more complex configurations, useful selector mechanisms for different scales of job, and systems offered to suit both medium and heavy duty applications.

Assisted Lift Brochure

Illustrated literature giving advice and general information on safe handling, installation and maintenance of all our products.

Access Covers Brochure

A detailed manual with full technical detail on the complete range of our access covers and frames for all loading groups.

The manual includes product selector guides and installation information. Also available is complementary interactive software that allows you to design your own drainage system. Register your details with us on the MyGatic section of our website; alternatively, register by phone or email.
